Living With Frontotemporal Dementia -
An Interview With An Expert And Care Partner

Radio

Live Staff Training    1 Hour
Family Caregivers & General Public    1 Hour

**Program Description –**
We will hear first hand from someone in the trenches with the disease on what life is really like when caring for someone with Fronttemporal Dementia and how to deliver patient centered care.

**Objectives –**
- Define the disease along with differences and similarities to other types of dementia
- Learn how to cope with the disease as a care partner; both professional and family
- Explore how learning to live with gratitude and appreciation can enhance your care delivery.
