Patient Centered Care From Their Perspective-
An Interview With Those With Memory Loss

Radio

Live Staff Training  1 Hour
Family Caregivers & General Public  1 Hour

**Program Description** –
Here we will interview individuals with early memory loss. We will discuss patient centered care. What it is in their eyes. What is important to them and what they value and why when it comes to their care. We will talk about their fears and what they consider abusive behavior. Participants will have the opportunity to ask questions and make comments.

**Objectives** –
- Hear from those living with dementia what life is really like
- Explore new ways of thinking to engage people with memory loss
- Discuss the importance of routines and the impact they have
- Define and discuss the importance of an environmental checklist and how it can help reduce behaviors.
- Find out what matters to those with memory loss and why
- Discuss what they fear and feel
- Get a List of Recommendations from those living with memory loss
